RE: Site Inspection, Red Rock Mine, M/037/050, San Juan County, Utah

An inspection was made of the Red Rock mine on June 2, 1988. Frank Filas accompanied me on this inspection and briefed me on the history of the site.

The site has probably been inactive since 1984. No recent activity was apparent at the site. Trash and debris can be found littering the entire site. The waste pile has been pushed onto an ephemeral drainage. The drainage appears to carry a large amount of runoff at times.

I sent a letter to Clayton Stocks of S and S Mining Company, last May of 88, asking him to clean up the site. I have not heard from Mr. Stocks since the certified letter was sent. The letter indicated that he had until June 15, 1988 to reply or the Division would begin forfeiture proceedings. I recommend that we initiate this process.

I have attached photos with this memo.
